

People at CTG

G. Brian Burke
Senior Program Associate

Specialty

- Cross-boundary and transnational knowledge and information sharing networks
- Assessing the value of government information technology investments
- Government information management strategies

Brief Bio

Brian is a senior program associate at the Center for Technology in Government, University at Albany, State University of New York. He is responsible for designing and managing Center projects and developing new research opportunities focused on helping government foster public sector innovation, enhance capability, and generate public value. Brian also represents CTG on state, national, and international level advisory and work groups and at various academic and other professional conferences.

Brian has worked closely with governments at all levels in the United States and internationally as well as private sector experts and fellow researchers on understanding how policies, management practices, and information and communication technologies interact with and influence the performance of government and government's relationships with citizens and other non-government actors. Most recently, Brian's work has focused on the topics of Cross-Boundary and Transnational Knowledge and Information Sharing, Government Interoperability, and Assessing the Public Value of ICT Investments.

Prior to CTG, Brian worked for AT&T Government Solutions in the Office of the U.S. Secretary of Defense. Before that, he served as an officer in the United States Air Force.
