

Overview

A major portion of the Center's mission is to disseminate project and research results throughout the public sector. To achieve this goal, we announce our new projects, guides and reports, and resources through our Web News distribution list, press releases, Innovations newsletters, and conferences and presentations.

On the Calendar are links to past and upcoming items of interest involving CTG.

In the News are links to what others are writing about CTG.

CTG Online News are stories about recent CTG activities and events.

Press Releases announce the start of new projects, release of a publication, receipt of a grant and award, or hosting an event.

Web News is a monthly e-mail distribution list that we send to announce news about our projects, publications, and events.

Innovations, CTG's past print newsletter, was published three or four times a year to highlight CTG activities, ongoing partnership projects, research findings, and events. We currently maintain an archive of all the issues dating from 1995-2003.

Conferences and presentations provide venues for CTG staff to discuss current or recently completed partnership projects and research.
