Request for Expert Presentations

CTG is seeking subject matter experts in the areas of Web site management, content management, and web design as these subjects relate to XML based Web site management. Representatives of private companies, nonprofit organizations, educational institutions, or individual experts are invited to submit a proposal for presentations of one-to-two hours, on a variety of topics as part of a workshop series, related to the above areas.

Now Accepting NY State and Local Government Agencies Proposals

New York State agencies and local governments are invited to apply to participate in a project that uses a new Web site framework based on XML. The goals are more effective web sites and better management of site cost and complexity. The project is being conducted in cooperation with the NYS Governor's Office of Employee Relations (GOER), the Office of the Chief Information Officer (OCIO), and the Office for Technology (OFT). It will involve training sessions, workshops, and hands-on development of prototypes and business cases.
