2003 Annual Report Available Online

As we celebrate ten years of research, partnership, and innovation, we thank you for being part of the Center for Technology in Government.

This year especially, we want to acknowledge that CTG's progress and success depend on the effort and support of our partners. Agency and corporate partners, individual participants, research colleagues, and international visitors all contributed to the vitality and value of CTG.

Our goal for the next ten years is to continue to support the work of government by generating new knowledge and practical resources for effective use of information and technology in the public sector.

For more about our research projects and results please read our 2003 Annual Report at www.ctg.albany.edu/publications/annualreports/ar2003/ar2003.pdf.

NY State-Local Internet Gateway Prototype Presentation

On Thursday, May 20th from 9:00 am - 12:30 pm at the Legislative Office Building in Albany, CTG will showcase the New York State-Local Internet Gateway Prototype, developed to test the concept of a single point of contact for state-local government business in New York State.

CTG, corporate partners CGI and Keane, Inc., and state and local governments from the project's Prototype Team and Advisory Committee will share insights on the development process, discuss lessons learned, and present findings and recommendations.

Please register by May 15 online at www.ctg.albany.edu/projects/lg2-registration, or call Christina Pagano at 518-442-4473.

World Trade Center Research Symposium Rescheduled

The "Turning to Digital Government in the Wake of 9-11" Research Symposium has been rescheduled for Monday, June 14, 2004 from 2 to 5 pm at the Recital Hall in the Performing Arts Center on the main campus of the University at Albany, SUNY.

The symposium will present the findings of our research into the response to the World Trade Center attacks, particularly the critically important roles of information and technology in that response.

For more on this project, visit our Web site at www.ctg.albany.edu/projects/wtc1.
