SPOTLIGHT ON

CTG's Anthony Cresswell honored with The NYS Forum's Award for Excellence in Government

Every year, The Forum recognizes an individual whose work has definitively contributed to the overall improvement of government information services in New York State. This year's award was presented to CTG's Anthony Cresswell in recognition of his vital guidance to The Forum's program development and his leadership role as interim director at CTG.

NEW REPORT

"International Digital Government Research: A Reconnaissance Study (1994 - 2008)"

This study is part of a multi-year effort funded by the United States (US) National Science Foundation (NSF) to create a framework for a sustainable global community of digital government researchers and research sponsors. It documents how the growing influence of global economic, social, technical, and political forces are pushing digital government research to international dimensions. In this report, we describe the size, scope, variety, and trajectory of the field illustrated with selected studies and organizational profiles. A full bibliographic database is also available covering comparative, transnational, benchmarking, and other types of international studies published from 1994 through 2008.

UPCOMING EVENT

GTC EAST: The New York Digital Government Summit Empire State Plaza, Albany, NY September 21-24, 2009

"Rethinking the Database: Using XML Databases to Support Business Processes and Enhance Capabilities" Jim

Costello, Web Application Developer, Center for Technology in Government, University at Albany James Lieb, Director, Common Service and Case Management Department of Taxation and Finance, New York State
September 24 at 10:30 am

XML has proven to be a solution for web site management, web applications, and data exchange. So what's next? This presentation looks at new ways to view and use data within XML databases. It will show how an XML-based approach to data can make application development easier and more manageable. You will see how an XML database can enable the addition of new features and functionality while streamlining workflow. The presentation will outline promising trends in mainstream applications such as document management and forms workflow processing using XQuery, XForms, and XML-native databases. Finally, you will hear about an large-scale New York State government implementation using the IBM DB2 database with pureXML support.
